

Calfos

Calcium Phosphate Block

Properties: For older matured grasses lacking phosphorus. Calcium and phosphorous are essential, a ratio of 2 : 1 is sufficient. Also suited to areas of acid soils where pastures are older and phosphorous is not available. Cattle need approx 10g of phosphorous per day.

Ingredients: Salt, Ground limestone, Magnesium oxide, Mono di calcium phosphate and Molasses.

NUTRIENT ANALYSIS	
Sodium Chloride Max	52.0%
Lime	22.0%
Magnesium oxide	0.16%
Phosphoric acid	10.90%
Molasses	10.0%

20kg Block

(Hard pressed)

Recommended feeding based on 1 block per number of head

Number of Sheep	Number of Cattle	Number of days
70	10	28

The above feeding rates are a guide only. Variances due to pasture quality, climate, workload and age of the animal will give different results. This product is suitable for ruminants only and not recommended for other animals. Please use the feeding table as a guide only and ensure feeding guide is introduced gradually to all animals, as unobserved diet changes can be detrimental to final results or the animals health.
