

Copper Cobalt

Properties:

A Cobalt deficiency can cause loss of appetite, muscle wasting, anemia and scaly ears. A Copper deficiency causes emaciation, stunted growth, swing back in lambs and a dull coat. Particularly suited to the north coast and new England areas of northern NSW or where ryegrass pasture is grazed. Also useful in areas where copper deficiency occurs in the soil. Not suited to areas where stock have access to Patterson's curse or heliotrope plants. Not suited to areas where copper poisoning occurs.

Ingredients:

Salt, Ground limestone, Copper sulphate, Cobalt sulphate, flavour attractant and Molasses.

NUTRIENT ANALYSIS	
Sodium Chloride Max	82.0%
Sodium Chloride Min	80.0%
Calcium	4.75%
Copper	1250 mg/kg
Cobalt	44 mg/kg
Molasses	5.0%

20kg Block

(Hard pressed)

Recommended feeding based on 1 block per number of head

Number of Sheep	Number of Cattle	Number of days
70	10	28

The above feeding rates are a guide only. Variances due to pasture quality, climate, workload and age of the animal will give different results. This product is suitable for ruminants only and not recommended for other animals. Please use the feeding table as a guide only and ensure feeding guide is introduced gradually to all animals, as unobserved diet changes can be detrimental to final results or the animals health.
