

Green Feed Block

Assist with bloat, swollen abdomen and acute tympany brought on from fresh green legume pastures.

Properties:

This block is of value in legume pastures during periods of bloat risk. The blocks should be put out before the risk appears and sufficient blocks distributed to ensure that even shy feeders have access to blocks. A softer block to allow maximum consumption. This product uses an anti foaming agent in the form of Teric Oil which settles on top of the stomach and reduces the production of foam that builds up and causes bloat.

Ingredients:

Molasses, Poloxalene, Rock phosphate, Lime, Wheat, Sorghum, Barley, Magnesium sulphate, Magnesium carbonate, Salt, Iron sulphate, Sulphur, Potassium iodide, Manganese sulphate, Zinc oxide and Cobalt sulphate.

NUTRIENT ANALYSIS	
Teric Oil (anti foaming agent)	8.25%
Molasses	16.0%
Total Phosphorous	5.20%
Di Calcium Phosphate	5.0%
Total Calcium	8.75%
Calcium Carbonate	4.40%
Total Magnesium	4.20%
Magnesium Sulphate	2.10%
Magnesium Carbonate	2.10%
Min Crude Protein	2.50%
Max Crude Fat	0.50%
Max Crude Fibre	6.50%
Max Salt	27.0%
Iron Sulphate	0.30%
Sulphur	1.01%
Potassium Iodide	0.15%
Manganese Sulphate	0.005%
Zinc Oxide	0.015%
Cobalt Sulphate	0.015%
Max Florine	0.020%

20kg Block (Hard pressed)

Recommended feeding based on 1 block per number of head

Feed prior to going into risky pasture and whilst stock are there

Number of Sheep	Number of Cattle	Number of days
50	10	28
