

Iodised Salt

For Goitre (enlarged thyroid gland).

Properties:

Certain feeds (of the cabbage family, turnip and rape seed) contain goitrogens which interfere with the use of thyroxin and may produce goiter's. Iodised salt is the most economical way of supplementing and relieving the occurrence of thyroid gland enlargement or goiter. Blocks allow for free choice feeding.

Ingredients:

Salt, Iron sulphate, Potassium iodine, Calcium carbonate, Bentonite and Red oxide.

NUTRIENT ANALYSIS	
Sodium Chloride Max	99.45%
Iodine	0.05%
Calcium	0.50%
Iron	0.05%

20kg Block

(Hard pressed)

Recommended feeding based on 1 block per number of head

Number of Sheep	Number of Cattle	Number of days
70	10	28

The above feeding rates are a guide only. Variances due to pasture quality, climate, workload and age of the animal will give different results. This product is suitable for ruminants only and not recommended for other animals. Please use the feeding table as a guide only and ensure feeding guide is introduced gradually to all animals, as unobserved diet changes can be detrimental to final results or the animals health.
