

Lamb Feedlot Fullfeed Finisher Pellet

Maximize daily weight gains

Lamb Feedlot Fullfeed Finisher pellet has the hay, fibre, energy and protein all in the pellet. Feed conversion and maximum weight gain are paramount. Lamb feedlotters require variable protein sources, high energy cereal grains and control from grain poisoning. Furneys Lamb Feedlot Fullfeed Finisher, provides all of these benchmarks. Because the pellet ingredients are ground and steam pressed this presents the single greatest advantage over farm mixes. The lamb uses little digestive energy. Most 1st X lambs will gain weight approx 280 to 300 gm, per head per day.

**Available in :-
30kg bags
Bulk Bags
and Bulk upon request.**
